Every effort will be made to clean and remove all the tarter from your pet's teeth, however, they are awake and depending on how much they wiggle it may be impossible to remove all tarter from their teeth. We strive to give your pet the best care during their appointment. We have no control how long the dog or cat we are performing the dental on will take. If we find problems, for example loose teeth, we will talk to you after the cleaning and let you know if any other action is necessary. Please understand our service is to promote preventative dental care and can not replace a dental under anesthesia or xrays if needed.
